

# WALKTHROUGH VIDEO TOUR CHECKLIST

1

## FILM HORIZONTALLY

Filming with your phone horizontally allows for more of your home to be captured in the shot.

2

## STABILIZE THE SHOT

- Use a non-extended selfie stick-stick or other stabilizer if available/
- Keep your arms closer to your body rather than farther away from you.
- Slow your walking and other movements. It may feel unnatural but will appear normal in footage.

3

## SHOOT DURING THE NOON HOUR

At this time the sun is directly overhead resulting in even, natural light coming through your windows.

4

## TURN ON LIGHTS AND OPEN CURTAINS

This helps make the video as bright as possible, helping your agent see all areas of your home more clearly.

5

## CLEAN AND ORGANIZE

This way your home will present the best! Tidy up toys and items off the floor, organize counters, and make sure toilet seats are down.

6

## HIGHLIGHT YOUR FAVORITE FEATURES

Be sure to film your favorite aspects of the home and mention why they are special in the video
